DISCUSSION: The Site Inspection Prioritization (SIP) report for this site completed by the Technical Enforcement Support contractor PRC Environmental Management, Inc. was reviewed. There have been no documented observed releases to the environment at the site. The waste quantities on-site were low and the target populations near the site are limited. The site score of 20.00 was generated using the PA-Score software program model. Since the score was below the 28.5 necessary to be considered for inclusion on the National Priorities List of Superfund sites, a decision of No Further Remedial Action Planned under Superfund will be entered for this site. The site will be returned to the Louisiana Department of Environmental Quality for any further action, if appropriate, under state regulations.
